

Nέα NSP-122 Power Banks

NSP Power Banks is the new offer from **VOLTE-TEL**, for those who want to be able to charge their favorite devices anywhere and anytime. With overload protection, low voltage and short circuit, it is absolutely safe to use. **They have a built-in micro USB port for charging while using the built-in USB ports and the right cable you can charge any smartphone, tablet, MP3 / MP4 Player, Digital Camera, GPS, PSP, Bluetooth, speakers, electronic cigarette and any other 5V charger with USB cable.** The package includes a micro USB cable, which is compatible with most of the smartphones and tablets on the market.

NSP-122 with a **12000mAh Li-Polymer battery** and **2 USB ports** with **1200mAh** and **2400mAh** output power can charge up to 2 devices at a time. Make sure you use your devices, that you bring along with you in trips and excursions. **NSP-122** guarantees that you will not run out of battery power.

By pressing the On / Off button, the 4 blue LEDs tell you what percentage of the power bank is charged, while as you are charging the power bank or device, the LEDs flash to show you how much the charge has progressed. Double-pressing the LED next to the **Micro USB port** on and off acts as a **lens**.

It measures 15.1x7.5x1cm and includes a micro USB cable, which is compatible with most of the smartphones and tablets on the market. It is also suitable for devices that have Type C, in addition to choosing the NSP micro USB to Type C adapter.

With its modern design, **durable high-quality aluminum construction** and 4 colors to choose from, the new **NSP-122** will become your new essential gadget.
