

GARAGE DOOR REMOTE CONTROL RECEIVER

2 VRC2 CHANNELS UP TO 250 REMOTE CONTROLS

This is an easy-to-install receiver, in which only one command is sufficient to operate the automation. **The receiver is suitable for door control mechanisms, shutters and alarm systems, panic buttons (Personal Security), home automation (garage doors, lights, awnings, windows, automatic watering car alarm etc.).** It is powered by 12 or 24 Volt AC or DC.

The receiver can be programmed to receive up to 250 total keeloq 64-bit or fixed code remote controls.

The remote control other than a transmitter is also a receiver. **In this way, it can be programmed by other remote controls of the same type. It can also be self-scheduled by putting itself a random password to any button we want. Overall, it can be self-programmed or program up to 3 different codes, that is a code for each key.** It is small, practical to use and has a link for adding to keys.

Main Features:

- Up to 250 remote controls can be registered.
- Operating frequency 433.95 MHz / Bandwidth 420 KHz .
- Sensitivity-117dBm
- Power supply voltage 12-24 VAC/DC.
- 1-2 relay output N.O./N.C. -1A/24VDC
- Select button or hold function.
- Technology SMD / CE Compliance.
- Dimensions: 75X90X30mm.
