

## NEW NSP ROTATED 360° MOBILE BASE-STAND WITH RING

NSP's new practical 360° swivel stand-ring is a unique accessory to easily carry and hold your device safely. The ring on the base adapts to your finger, fixing the phone in your hand to make it work faster, minimizing the risk of slipping from your hand. It also has the ability to rotate 360 degrees and vertically 180 degrees.

It features a powerful 3M film to easily and conveniently mount on the back of your favorite smartphone to keep your device secure and easier to control when talking, texting or taking pictures.

Its innovative design can transform it with a simple move into a functional stand so you can watch your favorite programs, video clips, etc., or communicate

better with your own people in your video calls. However, its use does not stop there, for those of you on the go who do not want to limit your communication, it can fasten to any car air duct without causing any damage or scratches thanks to its elastic brackets.

In conclusion, this NSP base combines three usage modes:

**1st Built-in ring to minimize the risk of the device slipping out of your hand.**

**2nd Functional Stand for your video calls as well as viewing your videos.**

**3rd When on the go you do not need to limit your communication as it snaps into any car air duct.**

Available in four different colours:

**Blue, Red, Pink Gold and Black.**
