

## **NSP OFFICE SUPPORT BASE MOBILE/ IPAD / TABLET**

The **new support base** from NSP highlights effectively any mobile or tablet it holds.

It has an **ergonomic design** with a flexible **60 cm** arm which will maintain the bend you will give it. The arm ends in a **powerful** and **secure** mounting clip for any **mobile device**, **Tablet**, **MP3 / MP4 Player**, **compact camera**, **etc**., with sizes from **4.0**" to **10.6**".

The clip can be **rotated 360 degrees** and has a **non-slip protective silicone** on the inside so that there is no risk of improper movement of the device.

It has a stable **strong screw type support base** with **easy installation / removal** without any tools in any office or bench with a maximum thickness of 8cm.

Inside the base there are **pads** to **avoid** unsightly, and often indelible, marks on the surface you want to place.
