ANTISHOCK AIR TPU WITH STRAP
FULL CAMERA PROTECTION

The new **ANTISHOCK AIR TPU WITH STRAP cases** by **IDOL 1991**, featuring an innovative design, are perfect for those seeking a durable case that ensures the safety of their beloved smartphone.

The cases are equipped with a round metal clamp that allows you to adjust the strap length according to your preference. The strap has a maximum length of 75cm and can be adjusted from 1cm to 75cm, enabling you to wear it around your neck, crossbody, or even on your wrist. It's a stylish strap that connects to a detachable transparent **ANTISHOCK AIR TPU case** with screws. The case features additional TPU material at the corners with hollow spaces inside, acting as airbags to absorb shocks in case of a drop.

It is ideal for those who want to combine protection and full functionality, thanks to the specially designed inner side with small holes that allow the case to "breathe," preventing unsightly "marks" on the back of your smartphone.

The raised edges provide extra protection for the screen against scratches, even when placed face-down. For the rear camera, the **Full Camera Protection** and **Camera Guard** features ensure the safety of your phone's cameras, even on rough surfaces.

This particular neck strap is especially useful when your device is too large for your pockets or when there's no room in your bag for storage. It's also perfect for seniors and parents, offering them hands-free convenience to talk via headphones or speakerphone while keeping their hands free for other activities, such as caring for their baby, pushing a stroller, or engaging in other tasks.

Features:

- **Air Cushion Technology - Shock absorption for drops.**
- **Can be worn around the neck, crossbody, or on the wrist.**
- **Length: 75cm.**
- **Adjustable strap for a perfect fit.**
- **Provides access to all functions.**
- **Raised frame offers extra screen and camera protection.**
- A practical gadget with the look of a stylish, modern necklace.
