

NEW CASES **ARMADILLO LIME SUCCESSORIES** BY **VOLTE-TEL**

The new **ARMADILLO** case by **LIME SUCCESSORIES** and **VOLTE-TEL** with **special design to resist bumps**, is able to protect your favorite smartphone from any damage or accident, while offering **modern style** without compromises.

The new **ARMADILLO** case by **LIME SUCCESSORIES** is made by a combination of soft TPU and polycarbonate (PC) materials so that it can resist **bumps and falls of all kinds**. It has **raised edges that ensure the protection of the screen** while at the back has a **built-in Camera Guard for complete protection of its cameras** against any flat surface.

In addition, the **Antishock** design, offers protection to the **corners of the case** as it works like an **airbag, absorbing bumps and vibrations** in a possible fall, while its back is **reinforced with non-scratch, non-slip material** that does **not leave marks**, preventing your mobile phone from slipping out of your hands.

Finally, thanks to the ergonomic design, the **ARMADILLO** cases "**embrace**" your smartphone from **all 4 sides** while at the same time ensuring **full access to all the functions of the device** such as the camera, the speakers, the microphone and the charging port.
