

**3D EDGE GLUE SEMI CURVED FINGER UNLOCK**  
**TEMPERED GLASS**  
**CASE FRIENDLY**

The new **3D EDGE GLUE SEMI CURVED FINGER UNLOCK TEMPERED GLASS SCREEN PROTECTOR** by **IDOL 1991** and **VOLTE-TEL** is one of the thinnest on the market, with a thickness of just **0.25mm**, so it doesn't add any bulk to your smartphone and doesn't alter the texture of the screen. Nevertheless, it protects the screen even from hard scratches and impacts.

The **3D EDGE GLUE SEMI CURVED FINGER UNLOCK TEMPERED GLASS SCREEN PROTECTOR** is designed to be 'Case Friendly,' meaning it is fully compatible with cases that have **raised edges** for screen protection. It doesn't affect the **contrast, brightness, colors, or touch sensitivity** of the screen because it is **100% transparent**. Thanks to its special design, it provides **full coverage and does not interfere with the use of the optical fingerprint sensor**. It has a high hardness rating of **9H**, making it **very difficult to scratch or break**, especially compared to standard screen protectors. It is made with **high-precision, rounded 3D edges for increased safety and to prevent injuries**. In the event that it does break from a hard impact, it shatters into small pieces that **do not scatter**, just like a car's windshield, so there's no risk of user injury or screen scratches.

Finally, due to its construction material, you are **free from unsightly bubbles** that can easily form when using standard protectors, as it **fits perfectly** and very easily onto your smartphone screen.

**It is recommended to re-register your fingerprint after applying the Tempered Glass.**
