

MAGSAFE ANTISHOCK CLEAR AIR TPU

Get the new modern transparent cases for your favorite iPhone - **MAGSAFE ANTISHOCK CLEAR AIR TPU** by **IDOL 1991** and **VOLTE-TEL**.

These cases are made from high-quality, **durable ACRYLIC + TPU material** that stands the test of time. This ensures effective protection for your device from various potential damages such as scratches, impacts, and dust. Additionally, all materials are optimized to **prevent yellowing over time**.

Beyond their elegance, the interior of these cases features **built-in magnets that align perfectly with the iPhone**, allowing easy attachment and removal of the wireless charger.

Moreover, they are designed with **AirBarrier technology**, which creates an air gap between the iPhone's glass back and the case, providing further protection.

The raised edges safeguard the screen from scratches, even when placed face down, while the **Full Camera Protection** feature protects the phone's cameras on rough surfaces.

The cases also come equipped with an **Antishock protection system** at the corners, acting like airbags to absorb shocks in case of a drop.

Finally, you can **access all your device's features**, such as the camera, speakers, microphone, and charging port, without any hassle. You can talk or take pictures effortlessly while your beloved iPhone remains fully protected in its case.

When it's time to charge your iPhone, simply place it on the **MAGSAFE** charger.
