FULL FUNCTIONALITY!

The NSP 2700 mobile phone is the ultimate tool in its category! With a smart and ergonomic foldable design, it offers unmatched comfort and ease of use in your daily life. It features a **large, user-friendly keyboard** and a **dedicated SOS button** to keep you feeling completely safe at all times. The innovation of the NSP 2700 lies in its **dual-screen integration**, with a **2.8-inch internal screen combined with a 1.77-inch external screen**, allowing you to view important information without the need to open the cover. A particularly useful feature of the NSP 2700 is the **bright indicators**, which immediately notify you of **missed calls or messages** in case you don't notice or have the time to check them.

ENHANCED USABILITY AND COMFORT

The NSP 2700 is extremely user-friendly, thanks to its **large buttons** that make typing easier and help avoid accidental calls. The "5" key has a **small protrusion**, making it easy to **locate without needing to look at the keypad**. This way, even without looking at the screen, you can easily place your finger on the correct key. Additionally, the **2.8" color screen with a 262K color resolution** provides excellent clarity, making the information clear and easy to read, so you won't strain trying to see the details.

SMART VOICE TECHNOLOGY FOR IMMEDIATE USE

Finally, the NSP 2700 also incorporates **call voice recognition technology**, making it even more user-friendly and accessible. Every time you receive an incoming call, the **phone announces the caller's number**, allowing you to instantly know who is calling without having to look at the screen. It also features a **voice-enabled keypad**, which helps you select the desired numbers by announcing each number you choose, making it easier to use **for individuals with vision or mobility difficulties**.
