

## NEW **CARBON LIFT** CASE CAMERA PROTECTIVE BY VOLTE-TEL

The first essential step you should take after acquiring a new smartphone is to protect it with a case that not only provides the necessary protection but also adds a touch of style. The new **CARBON LIFT CASE** by Volte-Tel, available in three colors — **red, black, and blue**— is the perfect choice! Slim and lightweight, this case fits perfectly, adds no bulk, and preserves the sleek look of your valuable smartphone.

Made from **durable matte TPU material** with a reinforced skeleton structure, it safeguards your device from **shocks, impacts, and scratches** that may occur during daily use. It is enhanced with an **anti-slip material** to prevent the phone from slipping out of your hand. The **raised edges around the case** offer effective protection from unexpected threats, such as the device falling flat on the ground.

The new "**Camera Protective Design**" features a metallic structure that protects the camera and surrounding area, adding height to prevent the lens from making contact with flat surfaces and avoiding potential scratches or abrasions. Additionally, the carbon-patterned exterior resists smudges from fingerprints or slip marks.

Finally, it proves to be exceptionally user-friendly, as it allows full access to all features and functions of your smartphone, giving you complete control.
