

NEW ARM N24B 360 ROTATING WITH FLEXIBLE NECK 32CM FOR CAR MOUNTING

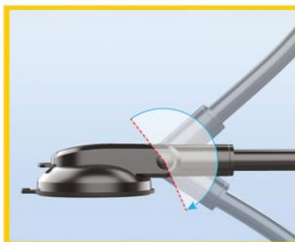

The arm easily attaches to your car's **windshield** or **dashboard**, providing multiple installation options depending on your preferences and the space in your vehicle. All you need to do is remove the protective film from the suction cup of the arm and place it in a convenient location. The suction cup (**70mm**) allows for rotation up to **210°** and is **reusable** (you can wash it with warm water and dry it with air). The flexible arm (**32cm**) offers stability while allowing adjustment to various angles and heights, enabling the ideal setup for every driver and vehicle. In the middle of the arm, you can easily attach the **anti-shock support** for extra grip, which, thanks to its **3M adhesive**, further enhances the protection of the mount.
