

New Brand!
New TEMPERED UV GLASS 10D
IDOL 1991
from VOLTE-TEL.

TITANIUM
SEMI CURVED FULL GLUE TEMPERED GLASS

IDOL 1991 and VOLTE-TEL have released a new breakthrough **TITANIUM** screen protector that will impress even the most picky customers.

With only **0.25mm thickness**, IDOL 1991's revolutionary **TITANIUM SEMI CURVED TEMPERED GLASS** provides **high precision rounded edges** for greater safety and damage prevention. The particular **structure with titanium alloy** now makes it incredibly indestructible, protecting the screen of your favorite smartphone.

This Tempered Glass is perfectly compatible with cases that have **raised edges** to protect the phone's screen. It has no effect on the screen's contrast, brightness, colors, or sensitivity because it is **100 percent transparent**. Even if it is crushed with a strong impact, it breaks into very small pieces without scattering, similar to a car windshield, providing no risk of damage to the user or damaging the screen.

Finally, the **TITANIUM SEMI CURVED TEMPERED GLASS** screen protector **does not block your fingerprint from being identified**.

After adding Tempered Glass, you will need to reinstall your fingerprint.
