NEW TEMPERED ANTI-SPY
IDOL 1991
 by VOLTE-TEL.

PRIVACY ANTI-SPY
SEMI CURVED FULL GLUE TEMPERED GLASS

The new **PRIVACY ANTI-SPY SEMI CURVED TEMPERED GLASS** from **IDOL 1991** allows the use of your mobile device in public spaces, without the fear of prying eyes looking at your sensitive info. The smartphone user can clearly see the screen but the people around see only a blackened dark area.

With just 0.25mm thickness, it has high precision curved edges for maximum safety. The specific tempered glass acts as a light filter that blocks visibility over a 35o angle. It is designed to be compatible with raised edge cases to maximize screen protection.

The Privacy Anti-Spy Tempered Glass has high hardness durability 9H that makes it hard to scratch or break. Even in the case that it breaks, it becomes many little pieces that stay together so it eliminates any danger of user injury or screen damage.
